REMARKS

This Response is submitted in reply to the final Office Action mailed on May 20, 2008. It is believed that no fee is due in connection with this Response, however, the Director is authorized to charge any fees which may be required, or to credit any overpayment to Deposit Account No. 02-1818. If such a withdrawal is made, please indicate the Attorney Docket No. 112857-61 on the account statement.

Claims 27, 29-31, and 33-41 are pending in this application. In the Office Action, Claims 27, 29-32, and 34 were rejected under 35 U.S.C. 103(a) as being unpatentable over US Publication No. 20003/0135852 to Kamemoto ("Kamemoto") in view of US Patent No. 6,177,931 to Alexander et al. ("Alexander"), US Patent No. 6,510,553 to Hazra ("Hazra"), and US Publication No. 20002/0007493 to Butler et al. ("Butler"). Claims 28, 33, and 35 were rejected under 35 U.S.C. 103(a) as being unpatentable over Kamemoto in view of Alexander, Hazra, and Butler and further in view of US Patent No. 6,064,376 to Berezowski et al ("Berezowski"). In response, Claims 27, 32, and 35 have been amended, claims 28 and 33 have been cancelled without prejudice or disclaimer, and Claim 42 has been added. In view of the amendment and/or the reasons set forth below, Applicants respectfully submit that the rejections are improper and should be withdrawn.

Applicants have amended independent claims 27 and 32 to recite, in part, the display control means controls to display a transition screen on the display device by gradually expanding and moving the selected symbolic image and gradually contracting and moving the specified television program. Support for the amendment can be found in Applicant's specification. For example, at page 25, line 19, through page 26, line 4, Applicants disclose the selected symbolic label moving while expanding to the large screen area where the main program has been displayed. At the same time, the frame of the main program moves while contracting to the area of the symbolic label. Moreover, this amendment incorporates the features of dependent claims 28 and 33 into claims 27 and 32, respectfully.

Regarding the obviousness rejection of Claims 27, 29-32, and 34 and Claims 28, 33, and 35 in view of *Kamemoto*, *Alexander*, *Hazra*, *Butler*, and *Berkezowski* Applicants respectfully submit that *Berkezowski* fails to cure the deficiencies of the previously cited references.

Berezowski fails to disclose or suggest a transition screen that involves a symbolic image moving from the second region to the first region while gradually expanding to fit the second region. Instead, Berezowksi teaches replacing the specified television program in the first region with the information corresponding to the selected symbolic image which then expands or contracts based on the information's aspect ratio. See, Berezowski, Fig. 5, 42 and 40; col. 2 lines 30-61. Furthermore, Berezowski is silent with respect to the frame of the specified television program moving from the first region to the second region while gradually contracting. Instead, Berezowksi suggests that the selected symbolic image remains in the second region and that the frame of the specified television program is no longer displayed. See, Berezowski, col. 2 lines 43-51. Thus, Berezowski fails to disclose a transition screen that allows for a specified television program and a symbolic image to transition to the other's region of the display by moving and gradually expanding or contracting to fit the region. For at least these reasons, Applicants respectfully submit that the claims as amended are novel, nonobvious and distinguishable form the cited references.

Accordingly, Applicants respectfully request that the obviousness rejections with respect to Claims 27-35 be reconsidered and the rejections be withdrawn.

Applicants further note that Claim 42 has been newly added. Applicants respectfully submit that the newly added claim is fully supported in the specification. For example, new Claim 42 is supported at page 25, line 19 through page 26, line 4. Applicants respectfully submit that the subject matter as defined in the newly added claim is patentable over the cited art of record for at least the same reasons as discussed above, and for the additional patentable elements recited therein.

For the foregoing reasons, Applicants respectfully request reconsideration of the above-identified patent application and earnestly solicit an early allowance of same.

Respectfully submitted,

BELL, BOYD & LLOYD LLP
